To ensure that your pushchair is used in accordance with these instructions, please read them fully. This pushchair conforms to EN 1888:2012 and is guaranteed for 12 months from the date of purchase against manufacturing defects. Your child's safety may be affected if you do not follow these instructions. This stroller is intended to carry child from birth up to a maximum weight of 15kgs.

**WARNING:** A child’s safety is your responsibility

**WARNING:** Ensure that all locking devices are engaged before use.

**WARNING:** Children should be harnessed in at all times. Always use the crotch strap in combination with the waist belt.

**WARNING:** DO NOT hang shopping bags from the handle as this may affect the pushchair’s stability. Use the basket provided - maximum weight 5kgs.

**WARNING:** This product is not suitable for running or skating. Never run or skate with your pushchair.

**WARNING:** It may be dangerous to leave your child unattended.

**WARNING:** Do not use this product as a bed, your child may become tangled in straps and suffocate.

**WARNING:** The child should be clear of moving parts while making adjustments or opening or folding the pushchair. Risk of serious injury (entrapment, laceration or amputation) exists.

**WARNING:** Do not let your child play with this product.

**WARNING:** Check that the pram body, seat unit or car seat attachment devices are correctly engaged before use.

**WARNING:** Check that the pram body, seat unit or car seat attachment devices are correctly engaged before use.

**WARNING:** The pushchair should be used in the furthest reclined ‘lie flat’ position for new born babies.

Accessories not approved by the manufacturer should not be used with this product.

Only replacement parts supplied or recommended by the manufacturer/distributor shall be used.

**IMPORTANT: RETAIN FOR FUTURE REFERENCE. READ CAREFULLY**
Chassis
- 2 x Front swivel wheels
- 2 x Rear wheels
- Seat Unit
  - Hood (sold separately)
  - Seat pad (sold separately)
  - Shoulder and crotch straps (sold separately)
- Basket
- Rain cover

Seat Unit
- Fitting the seat unit to the chassis
- Adjusting the seat unit
- Adjusting the calf support
- Using the 5 point safety harness
- Removing the seat unit from the chassis
- Fitting the seat unit hood (sold separately)
- Fitting the seat liner (sold separately)
- Fitting the shoulder and crotch pads (sold separately)
- Fitting the rain cover

Carrycot (sold separately)
- Assembling the carrycot
- Fitting the carrycot hood (sold separately)
- Fitting the carrycot apron (sold separately)
- Fitting the carrycot to the chassis
- Removing the carrycot from the chassis

Car Seat (sold separately)
- Fitting the car seat to the chassis
- Removing the car seat from the chassis

Care and maintenance
Chassis

1. Fitting/removing the front wheels
Press the metal pins of the front wheels into the designated holes at the front of the chassis until they click into place. There is no left and right. Check the wheels are secure by pulling down on them. To remove, press the quick release button on the side of the wheel housing.

2. Fitting/removing the rear wheels
Press the metal pins of the rear wheels into the designated holes at the back of the chassis until they click into place. There is no left and right. Check the wheels are secure by pulling them outwards. To remove, pull down on the quick release button on the inside of the wheel housing.

3. Opening the Chassis
In forward facing mode: Lay the chassis flat on the floor with the handle facing upwards.

From the handle, pull upwards and the front of the chassis will spring forwards. Note: the handle will extend as you open the chassis.

You can also rest your foot on the rear wheel support bar for extra stability when opening.

Adjust the seat back rest to the desired height, by lifting the adjustment handle at the back of the seat unit. Note: the handle will extend as you open the chassis.
In rear facing mode: Lay the chassis flat on the floor with the handle facing upwards.

From the handle, pull upwards and the front of the chassis will spring forwards.

Note: the handle will extend as you open the chassis.

You can also rest your foot on the rear wheel support bar for extra stability when opening.

4. Operating the parking brake
Press downwards on the parking brake pedal with your foot to activate the parking brake. Press downwards on the pedal again to deactivate the parking brake. **WARNING**: Never leave the pushchair without first fully engaging the parking brake.

5. Operating the front swivel wheel
Flick the small grey lever on the back of the front wheel housing to switch between fixed and swivel wheels.
4. Adjusting the handle height
Unclip the two handle locks on either side of the chassis frame by pulling them inwards.

Pull or push the handle upwards or downwards until the handle has clicked into place at your desired height. Clip the two handle locks back into place to secure the handle. **Note: The handle has multiple positions.**

5. Folding the chassis
In forward facing mode: Fold the seat in half by pulling the adjustment handle at the back of the seat, and pushing the backrest all the way forwards.

Unclip the two handle locks on either side of the chassis frame by pulling them inwards.

Push the handle downwards to the lowest height.

In forward facing mode: Fold the seat in half by pulling the adjustment handle at the back of the seat, and pushing the backrest all the way forwards.
Chassis

Using your thumb, slide the lock on the handle bar inwards.

Pull the handle towards the ground, holding the chassis by the central bar, so that it stands upright by itself.

Recline the seat all the way backwards.

In rear facing mode: Fold the seat in half by pulling the adjustment handle at the back of the seat, and pushing the backrest all the way forwards.

Unclip the two handle locks on either side of the chassis frame by pulling them inwards.

Fold the calf support inwards to reduce the folded size.
Chassis

Push the handle downwards to the lowest height.

Using your thumb, slide the lock on the handle bar inwards and squeeze the handle.

Pull the handle towards the ground, holding the chassis by the central bar, so that it stands upright by itself.

Seat Unit

1. Fitting the seat unit to the chassis
Insert the seat unit connectors into the main housing on the chassis, until it clicks into place. Note: the seat can be used in forward or parent facing mode.

2. Adjusting the seat unit
Lift the seat adjustment handle at the back of the seat unit and pull the seat backwards or forwards, letting go of the handle at the desired position. The seat will lock into place. There are 3 seat positions.

3. Adjusting the calf support
Pull the handle on the underside of the calf support, and raise or lower letting go at the desired position. The calf support will lock into place. The calf support has 3 positions.
4. Using the 5 point safety harness
To release the 5 point safety harness, press the central button on the buckle housing. The top buckles pull apart as shown in the image. To lock the safety harness, press the top buckles together as shown in the image, and clip all 4 buckles into the central buckle housing.

The shoulder straps can be altered by adjusting the sliders on the harness. The position of the buckles can be altered as your child grows by threading the buckle through the seat back at the higher position.

5. Removing the seat unit from the chassis
Squeeze the two handles on either side of the seat unit and lift the seat upwards out of the main housing on the chassis.

6. Fitting the seat unit hood (sold separately)
Align the back of the pushchair hood to the back of the seat unit, and push the seat adjustment handle through the hole in the hood.

Finally, click the hood bar back into the two slots on the seat unit until they click into place.

7. Fitting the seat liner (sold separately)
Feed the shoulder and crotch straps through the holes in the seat liner so that they align with their positions on the seat unit, and pull them all the way through.
Seat Unit

Secure the seat liner to the seat unit by fastening the press studs at the top of the seat liner, and to the back rest and seat (via the gap between the two).

8. Fitting the shoulder and crotch pads (sold separately)
Attach the shoulder pads around the shoulder straps and secure using the Velcro provided. Feed the crotch strap through the hole in the crotch pad as shown in the image.

9. Fitting the rain cover
Drape the raincover over the seat unit and fasten the velcro straps together at the front, back and sides of the pushchair to secure into place.

Carrycot (Sold Separately)

1. Assembling the carrycot
Remove the mattress and lining to gain access to the assembly bars at the bottom of the carrycot. Using the tabs provided, pull the bars until they click into place on the carrycot base. Put the lining and mattress back into the carrycot. **WARNING:** Ensure that the assembly bars are fully engaged before using the carrycot.

2. Fitting the carrycot hood (sold separately)
Zip the lower end of the carrycot hood onto the zip on the carrycot and pull all the way around.

Zip the two padded ends of the carrycot hood around the carrycot hood bar towards the handle, ensuring that leatherette handle can be accessed through the handle hole.
3. Fitting the carrycot apron (sold separately)
Zip the carrycot apron onto the zip on the carrycot and pull all the way around.

4. Fitting the carrycot to the chassis
First place the carrycot adapters (supplied with the carrycot) onto the chassis, with the arrows facing the direction that you want to place the carrycot. The yellow markers on the adapters should face inwards.

Then lower the carrycot onto the adapters until they click into place.

5. Removing the carrycot from the chassis
Press the two buttons on the carrycot adapters inwards
Lift the carrycot upwards from the handle.
The carrycot adapters can be removed from the chassis by squeezing the handles and lifting off.
1. Fitting the car seat to the chassis
First place the car seat adapters (supplied with the car seat) onto the chassis, with the arrows facing the direction that you want to place the car seat. The yellow markers on the adapters should face inwards.

Then lower the car seat onto the adapters until they click into place.

2. Removing the car seat from the chassis
Press the two buttons on the car seat adapters inwards.

Lift the car seat upwards from the handle.
The car seat adapters can be removed from the chassis by squeezing the handles and lifting off.
Care and Maintenance

• For cleaning, use only a mild detergent and warm water.
  • DO NOT USE BLEACH.
  • DO NOT USE any abrasive substances.
• From time to time, check your pushchair for loose screws,
  worn parts, torn material or stitching.
  • Replace or adjust the parts needed.
• This pushchair requires regular maintenance by the user.
• Overloading, incorrect folding and the use of non-approved
  accessories may cause damage or break the pushchair.
• It may be unsafe to use replacement parts or accessories e.g. child
  seats, bag hooks, rain covers, etc, other than those approved by the
  manufacturer or distributor.
  • Always balance the weight of the pushchair evenly.
• We advise that your pushchair is not stored or left outside
  at any time.
